SYSTEM DE LUXE

The "Corner Automatic Bar" System are designed to wrap up and harmonize the locations and the sets of Vending Machines, making the place attractive and tidy at sight.

The structures of the systems are strong, handy and well-finished, with rooms for separate litter collection, supporting planes, lightning, monitor, change coins and boards to communicate front, side and back advertising.

Personalization

Installation kit for Monitor 15"/20"

Structure in carbon steel for support for support and screen in "Lexan".

Round frontal shelf _Ø 300 mm

Shelf with hinge to allow opening the Vending Machines

Double litter collection furniture with service room

Separate litter collection furniture with two boxes, 120 lit. capacity each, and service room to place microwaves oven or something else.

Neon ceiling light fixture

Sheet steel light fixture, 15watt neon lamp, completely safety closed

Structure for advertising panel on side abutment of the furniture

Technical characteristics

The structure consists of Columns in extruded Aluminium Ø 100 (Exclusive Design Patent- D.A.Design Group), painted with epoxy dust of Grey Rafael colour.

The abutments are realized with ennobled fireproof chipboards, 10 mm thick, (grey Sarah colour).

Extensible telescopic bands are realized in carbon sheet-steel and painted with epoxy dust allowing the insertion of 1/2/3 or multiple of Vending Machines.

The System provides furniture to contain separate litter collection, good deposits or service rooms.

The System is based on modular pattern and allows to place any Vending Machine model (max height 183 cm), on demand it is possible to increase its height.
