# SYSTEM STRONG

## Technical characteristics

*The "Corner Automatic Bar" System are designed to wrap up and harmonize the locations and the sets of Vending Machines, making the place attractive and tidy at sight. The structures of the systems are strong, handy and well-finished, with rooms for separate litter collection, supporting planes, lightning, monitor, change coins and boards to communicate front, side and back advertising.*  
*The structure consists of columns in estruded Aluminium, the coating is made of 15/10 zinc-coated carbon sheet-steel and painted with epoxy dust.*

### Assessories

**Antivandalism structure with overall ceiling**

**Ceiling and top in polycarbonate**

**Ceiling light fixture**

**The machines are fixed, inside the structure, on lifted platforms in steel which are blocked on the structure and then on th floor.**

**Light fixture without ceiling**

**No hinge,screw or bolt at sight, all the structure is fixed from inside to make the composition more hermetic**

**Structure for side advertising panel**

**Double litter collection furniture**

**The structure includes signs.**
